**CEO's Report** 

For the period from 28 August 2018 to 24 January 2019

These initial company accounts are for finnCap Group plc (the "Company"), for the period from its incorporation on 28 August 2018 until 24 January 2019. finnCap Group plc was incorporated in order to become the holding company for the finnCap Group (the "Group"), comprising finnCap Group plc

and its subsidiaries.

The Company acquired finnCap Ltd on 26 November 2018, and Cavendish Corporate Finance (UK) Limited and Cavendish Corporate Finance LLP on 5 December 2018. The Company's shares were admitted to trading on the Alternative Investment Market of the London Stock Exchange ("AIM") on 5

December 2018.

In the Company's Admission Document, the Board stated that it intended to declare a small dividend in January 2019. As a newly incorporated company, finnCap Group plc is required to file Audited Initial Company accounts at Companies House before such dividend can be paid. This is the primary

purpose of this document.

The loss in the Initial Company Accounts is not representative of the performance of the Group for the period as it only recognises the intercompany management charges as revenue, the holding

company's operating costs and the one off costs for the IPO, acquisitions and AIM listing.

Consolidated accounts for the period from 28 August 2018 to 31 March 2019 will be prepared in due

course.

### **Notes to the Initial Company Accounts**

#### 1. General Information

finnCap Group plc (the "Company") is a public limited company, limited by shares, incorporated and domiciled in England and Wales. The registered office of the Company is 60 New Broad Street, London, EC2M 1JJ, United Kingdom. The registered company number is 11540126. The Company is listed on the Alternative Investment Market of the London Stock Exchange.

# 2. Basis of preparation

The Initial Company Accounts contain information about finnCap Group plc as an individual company and have been prepared on a historical cost basis. Amounts are rounded to the nearest thousand, unless otherwise stated and are presented in pounds sterling, which is the currency of the primary economic environment in which the Company operates.

These Initial Company Accounts have been prepared in accordance with International Financial Reporting Standards, as adopted by the European Union, and International Accounting Standards as issued by the International Accounting Standards Board (IASB) and Interpretations (collectively IFRSs) as endorsed by the EU.

The preparation of Initial Company Accounts in compliance with adopted IFRS requires the use of certain critical accounting estimates. It also requires Company management to exercise judgment in applying the Company's accounting policies.

During the period the Company made use of the banking facilities of finnCap Ltd, a subsidiary of the Company. As such there is no cash held by the Company and a Cashflow Statement has not been prepared.

Where the Company has control over an investee, it is classified as a subsidiary. The Company controls an investee if all three of the following elements are present: power over the investee, exposure to variable returns from the investee, and the ability of the investor to use its power to affect those variable returns. Control is reassessed whenever facts and circumstances indicate that there may be a change in any of these elements of control.

Subsidiaries are accounted for at cost when acquired. Subsidiaries acquired via a share for share exchange are recognised at net book value. Where the conditions are met, merger relief has been applied as required by section 612 of the Companies Act. As a result, a merger relief reserve has been create and no share premium recognised.

The Group operates equity-settled share-based remuneration plans for its employees. None of the Group's plans are cash-settled. All goods and services received in exchange for the grant of any share based payment are measured at their fair values using the Black Scholes model.

Where employees are rewarded using share-based payments, the fair value of employees' services is determined indirectly by reference to the fair value of the equity instruments granted. This fair value is appraised at the grant date and excludes the impact of non-market vesting conditions (for example profitability and sales growth targets and performance conditions).

# **Notes to the Initial Company Accounts (continued)**

All share-based remuneration is ultimately recognised as an expense in profit or loss with a corresponding credit to equity. Where vesting periods or other vesting conditions apply, the expense is allocated over the vesting period, based on the best available estimate of the number of share options expected to vest. Expenses are recognised in the company in which the service is provided.

Non-market vesting conditions are included in assumptions about the number of options that are expected to become exercisable. Estimates are subsequently revised if there is any indication that the number of share options expected to vest differs from previous estimates. Any adjustment to cumulative share-based compensation resulting from a revision is recognised in the current period. The number of vested options ultimately exercised by holders does not impact the expense recorded in any period.

# 3. Critical accounting estimates and judgements

The Company makes certain estimates and assumptions regarding the future. Estimates and judgements are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period are discussed below.

### Going concern

The Directors believe that the Company has adequate resources to continue trading for the foreseeable future. Accordingly, they are preparing the Initial Company Accounts on a going concern basis.

## 4. Risk Management

The overall objective of the Board is to set policies that seek to reduce risk as far as possible without unduly affecting the Company's competitiveness and flexibility. Further details regarding these policies are set out below:
