

What questions should NEDs be asking their executives around AI?

STRATEGIC INTEGRATION AND INNOVATION

How can AI augment and accelerate our overall business strategy and objectives?

What specific AI initiatives are currently underway or planned, and how do they differentiate us from competitors?

How are we fostering a culture of innovation and experimentation with AI?

ETHICAL IMPLEMENTATION AND RISK MANAGEMENT

What ethical guidelines and governance structures are in place for AI development and deployment?

What are the primary risks associated with our AI initiatives, and how are we mitigating them?

How are we addressing potential biases and ensuring transparency in our AI systems?

DATA GOVERNANCE AND INFRASTRUCTURE

What is our data strategy, and how does it support our AI initiatives?

How are we ensuring the quality, integrity, and security of the data used in our AI systems?

What infrastructure investments are needed to support our AI and data capabilities?

TALENT AND CAPABILITY DEVELOPMENT

What is our strategy for attracting, retaining, and developing AI talent?

How are we upskilling our existing workforce to work effectively alongside AI systems?

What partnerships or collaborations are we pursuing to enhance our AI capabilities?

REGULATORY COMPLIANCE AND COMPETITIVE POSITIONING

How are we staying informed about and complying with evolving AI regulations in our industry?

What processes are in place to ensure our AI systems comply with data protection and privacy laws?

How does our approach to AI regulation and ethics position us competitively in the market?
